DIGITAL HALAL ECOSYSTEM

1

A company opted to obtain Halal Certification in order to enter the halal market and fill a need in the market.

2

An organization must ensure that all halal related operations, documents, and records are properly implemented and maintained to build and uphold its Halal Assurance System (HAS). MyHALALGIG can provide practical assistance.

3

To ensure staff competency, company need to plan manage and optimize their current and future halal talent. MANTIS is capable of assisting.

4

To make sure that all halal criteria are being properly applied, audits must be performed periodically. QUIKHALAL is a tool that can do this.

5

The management must keep track of their performance to make sure that the chain's subsidiaries are appropriately applying the halal requirements. The analytics data may be obtained via HALALWATCH.

6

JAKIM/Certification body shall conduct document and on-site audits to ensure that all halal requirements are being correctly implemented by applicants. A tool that can be used for this is QUIKHALAL.

7

By applying data analytics, JAKIM is able to monitor the performance of the holders of halal certificates through HALALWATCH.
